Emerging Financial Management

Past Performance

Financial Management & Analysis

Need: Client Required Multi-level Program Insight
 Ward Logic developed a customized solution for program financial information and distribution. The solution drastically improved program oversight and allowed the client to redistribute various resources.

Financial Compliance & A-123

Need: Client Required Internal Controls Review
 Ward Logic tailored a solution, which documented numerous undocumented procedures, identified areas of system weakness, and allowed great reliance on system data quality and integrity.

Data Visualization

Need: Client Needed Insight into Awardee Info
 Ward Logic custom tailored a visual dashboard solution, which supported real time analysis and distribution, increased mission data oversight, and may support future resource redistribution.

ERP System Implementation

Need: Client Required Integrated ERP System
 Ward Logic analyzed client requirements, led client engagement through planning to lessons learned, and provided documentation into potential long term gaps and implementation weaknesses.

Enterprise Development

Need: Int'l Client Required Development Strategies
 Ward Logic defined client requirements. Following approvals, executed regional focused solution to promote sustainable business growth, provide access to capacity building, and analyze market links.

Trade Diversification

Need: Int'l Client Needed Greater Diversity in Trade
 Ward Logic analyzed current trade focus area and investments. Following the initial review, supported the client in developing a multi-year strategic plan to diversify trade portfolio.
